- One cup of salad greens provides an excellent source of vitamin A.
- Lettuce was among the first vegetables brought to the New World by Christopher Columbus.
- Wild forms of lettuce in Egyptian tomb paintings and written accounts of lettuce that date back to 79 A.D. all support evidence that salad greens are one of the oldest known vegetables.
- In the United States, lettuce is the second most popular vegetable (behind potatoes).
- Watch this video and learn about a farmer who grows salad greens!

Activity

- Research what hydroponics is and how it can be better for the environment. Use the space below to write down key information.
- Think about the different types of salad greens and pick your favorite. On a separate piece of paper, draw your salad green growing using hydroponics. Describe the environment you will need for your salad greens to grow. Be sure to include information like ideal temperature, amount of sunlight, and type of water.

Start Smart with Breakfast

Eating breakfast helps you grow healthy and strong. A nutritious breakfast also fuels your body, giving you the energy needed to start a new day.

Breakfast is the most important meal of the day.

Breakfast helps you:

- Improve your grades
- Pay better attention in school
- Increase school attendance
- Improve classroom behavior

What makes a healthy breakfast?

You should have three or more food groups in your breakfast (grains, fruits, vegetables, dairy, or protein). It is also important to include a food from either the dairy group or the protein group in your breakfast.

- Create two menus of a healthy breakfast that you plan to eat this week. List each item and the food group it comes from. You can look at the list of foods on page 3 for ideas.

Breakfast Menu 1 / Food Group

Breakfast Menu 2 / Food Group

- Did you eat the healthy breakfasts that you created? _____
