I pledge allegiance to my health, to not compare myself to anyone else. With fruits and vegetables I’ll fill my tray and get nice and sweaty every day. I have only this body and this one heart so today’s the day I’m going to start eating less chips and less sugary drinks and before I eat I’m going to think!
- Half of a medium persimmon is a good source of fiber.
- Persimmon trees are also used for timber (used in golf clubs, fabrics, and furniture), wildlife (flowers produce nectar for honeybees), and beautification.
- In Asia, persimmons have been grown for thousands of years and are close to citrus fruit in importance, both culturally and economically.
- The art of *hoshigaki* – hand-dried persimmons – is an important part of traditional Japanese New Year’s celebrations.

- **Click here to learn more about persimmons and watch a recipe demonstration.**
- Using the information you learned from the video, compare, contrast, and find similarities between the Fuyu persimmons and the Hachiya persimmons.
Let’s Eat Real!

Eating whole foods from plants and animals—fruits, vegetables, whole grains, legumes, lean meats, poultry, fish and low-fat dairy products—is so important. They are packed with the nutrients our bodies need. Some foods are processed foods. Although processed foods start out with ingredients from plants and animals, they are changed, sometimes a little and sometimes a lot, from how nature made them. Foods like sweetened beverages, chips, and candy that are processed a lot don’t have very many nutrients and are loaded with fat, salt, and sugar.

Eating real is also good for the earth. Foods that are whole, or close to whole, use less energy because they are not processed a lot and often have little or no packaging.

<table>
<thead>
<tr>
<th>Whole Foods</th>
<th>Minimally Processed (changed a little)</th>
<th>Processed (changed a lot)</th>
</tr>
</thead>
<tbody>
<tr>
<td>These foods are whole, real foods that help our body and the earth.</td>
<td>Many of these foods have fat, sugar, and/or salt added to them. Some of the nutrients are taken out during processing.</td>
<td>These foods have a lot of fat, sugar and/or salt added to them and many or all of the nutrients are removed during processing.</td>
</tr>
</tbody>
</table>

You have just learned all about why it is important to eat real. Eating real means eating whole foods from plants and animals and not eating too much processed foods. When you eat real, you are helping your body be the best it can be, and you are also taking care of the earth.

My Action Plan
I am going to eat __________________________ instead of ____________________________.

(whole food)                         (processed food)

Time of day (check one):    Days of the week (check as many as you like):
□ at breakfast    □ Sunday    □ Wednesday    □ Saturday
□ at lunch    □ Monday    □ Thursday
□ at dinner    □ Tuesday    □ Friday

Did I achieve my goal? ___________________________
