

I Pledge Allegiance to My Health

This pledge can be read daily at school or at home with your family to remind you of all the ways to take care of your body!

I pledge allegiance to my health,
to not compare myself to anyone else.
With fruits and vegetables I'll fill my tray
and get nice and sweaty every day.
I have only this body and this one heart
so today's the day I'm going to start
eating less chips and less sugary drinks
and before I eat I'm going to think!

Name

Cucumbers

Pickling Cucumber

Cucumbers grow on a vine.

- A ½ cup of sliced cucumbers provides a source of water. The cucumber is 96% water by weight.
- The cucumber species is divided into two categories: slicing and pickling. Slicing cucumbers are usually served raw in salads, sandwiches, sushi, and various snacks. Pickling cucumbers are made for the pickling process. They are usually smaller than slicing cucumbers with a thick, bumpy skin.
- The inside of a cucumber can be up to 20 degrees cooler than the exterior.

Food and Play Mapping

- Let's talk about the places in the community where people get food and play. We will start this by becoming familiar with maps. What purpose do maps serve? Maps present information about the world in a visual way.
- You can complete this activity in groups or as a class. Use a large piece of paper, chart paper, or the white board to map your school. You can use an internet tool like Google Maps to get familiar with the area around your school.

See the *Cool Cucumber Cuties* recipe in *Tasting Trios*.

- Next, draw in and label the places where people get their food and the places where they get their play or physical activity in the community. You can use the map on the next page as a guide. The symbols on the next page represent only some examples of places where you can get food and play; you can add more if you would like.
- Then, if you are making maps in groups, share your map with the rest of the class.
- Last, discuss the questions listed on the next page.

Food and Play Mapping

Discussion Questions

After completing your map, discuss the following questions.

- What places are close for you to buy food?
- What kinds of food do they sell?
- What places are close for you to play or be physically active? Is it safe?
- Next month, this discussion will include more detail about how our environment (the area where we live), can affect our health. Keep the map handy!
